

## 2 STATES O. K. SUFFRAGE LAW

Illinois First to Ratify the Amendment; Wisconsin Is the Second State.

Springfield, Ill., June 10.—Illinois is the first state to ratify the woman suffrage constitutional amendment. The general assembly approved the measure today. The vote in the senate was unanimous while in the house the roll call was 122 to 2.

**Wisconsin Also Ratifies.**  
Madison, Wis., June 10.—The Wisconsin legislature today ratified the federal suffrage amendment, the assembly voting 14 to 2 and the senate 21 to 1.

### WILL TEST REFRIGERATOR WHICH DOESN'T USE ICE

Miss Helen Swift of the home economics department of the University of Wisconsin is preparing to test out an iceless refrigerator which was designed by Mrs. Roland Harwell. The test will be made at the university and will be held in the summer. It will be tested out under home conditions.

The home sewing class established by Miss Swift at home now has 25 members. It was originally planned only for the children, with the view to teaching them to make their own clothes, but five American girls have also lately joined it.

## Buy Clover Leaf For Quick Action

The Clover Leaf Production Company is a new drilling and well company. The well in Block 12—right in the center of the city—drilled 100 feet, and the water level is down about 100 feet. Those who have been watching the drilling of this well predict that it will be one of the biggest in the district. The water level is now about 100 feet below the surface.

The Clover Leaf Production Company drills wells on a percentage basis only. And never less than 10 percent. This means that they receive at least ONE HALF of the oil produced in every well they drill—forever.

The field of the Clover Leaf is unlimited. They can drill from 10 to 20 wells on their own capital. One can readily see the enormous profits that such a company is sure to earn. Just think if Clover Leaf would have drilled the Burd-Wagoner, which sold for \$250,000, every stockholder would have received \$125 for every \$100 invested, and still estimated the same interest in the company. They have prospects of getting many more Burd-Wagoners.

There will be no more Clover Leaf Production Company stock sold after the company begins production. If you want to get in an oil proposition where shares have practically been eliminated and better yet some Clover Leaf Production Company stock NOW. If you want to see your investment well pay the message.

Clover Leaf is capitalized for \$250,000. The shares are \$5 per share. Immediate delivery of certificates from 25 Pasa.

## Police Watch Carefully For Home Liquors

El Pasoans Have Not Resorted To Substitutes To Great Extent.

Many and varied are the substitutes for the forbidden cup that cheer which have been captured by the police in their raids and arrests since the passage of the law which made El Paso a "dry" town. Confiscated peach juice, Florida water, "quakes" and compounded tea, coffee and sugar-soda, pop, lemonade and other liquid for some time were described as real "home" products by police. Captain One Thompson and Sergeant John Wood when asked if El Pasoans were following the lead of thirty cities in other dry areas and were attempting to manufacture their own "goods."

**Alcohol.**  
Much of the 1919 model wet goods discovered by the officers has not been of sufficient strength to warrant arrests, but many times the plentiful addition of whiskey or plain alcohol has made the El Paso home-made product strong enough under the law of the law officers.

In several cases home-made drinks have landed the drinkers in jail with a charge of "drunk" against their names on the books.

**Eastern City Record.**  
El Paso, however, is far behind that eastern city which reported over a hundred "drinks" from "home made" drinks to three caused by the real stuff.

**ALL WORLD RECORDS BROKEN BY TANLAC**

Bottles sold in four years would reach from New York to Denver.

This is an age of big business, and although the public has become accustomed to the growth and development of the business world, the story of Tanlac forms one of the most interesting chapters of America's latest commercial history.

Four years ago very few people had ever heard of Tanlac. Today, unquestionably, it is the largest sale of any medicine in the world, and is as well known in Canada as in this country. In the brief period of only four years time this now famous remedy has leaped from obscurity to the very pinnacle of success. Its fame, in fact, has long since spread beyond the limits of the continent, and numerous inquiries are now being received from many foreign countries.

Very few people, however, fully realize what a really wonderful record Tanlac has made. Indeed, if it were not for the unquestionable facts and figures given out by the largest and best known drug firms of the country the story of its success would be hard to believe.

Up to January first, the total sales of Tanlac amounted to approximately twelve million bottles. The sales, however, is increasing, for during the first ten weeks of this year over one million bottles were sold and distributed in the United States and Canada, the exact figure being 1,234,567 in three months.

At this rate, therefore, the sales for the present year will amount to more than five million bottles. This will mean that 17,000 bottles of Tanlac will be sold during every day of the year, or 1,100 bottles for every hour of the average working day.

These figures are too stupendous for the average mind to grasp, but one may visualize what twelve million bottles mean by imagining them laid out in a single file and to end. Thus laid they would make a track of Tanlac from New York through Chicago, and on to Denver, Colorado; or they would form a double track of Tanlac from the Great Lakes to the Gulf of Mexico. Piled end to end they would tower 125 times as high as Pike's Peak, or the 14,000 feet higher than the Woolworth building in New York.

The demand for Tanlac has become so great that its sales instead of being measured by the gross as other preparations have been, is now reckoned by the carload, and even by the train load. In proof of this it is noteworthy that the leading drug jobs everywhere now buy Tanlac almost exclusively in carload lots.

To supply the Pacific coast trade alone requires from forty to fifty car loads per year. Jobbers of the Middle West and South from seventy to eighty cars per year. One jobbing concern alone, the Evans-Cole Drug Company of Kansas City, Missouri, is selling at the rate of twenty car loads of Tanlac each per year.

A letter dated April 12th, Julius M. Price of that company says: "In figuring the amount of Tanlac sold since this agency we find that we are now working on the thirteenth car, having sold more than a quarter of a million packages in six months."

The well known drug firm of H. B. K. Drug Company, of Memphis, Tennessee, has sold over forty car loads since the introduction of Tanlac into their state four years ago. Mr. R. E. Ellis, president of that company, is authority for the statement that Tanlac has been sold in greater quantities than any other five medicines combined.

Within the past ninety days, ten carloads of Tanlac have gone to supply the demand of British Columbia, Saskatchewan, Alberta and Manitoba. Mr. Charles McElroy, President of Lomas Brothers & Company, Limited, of Toronto, one of the oldest and best known jobbing concerns in Canada, says: "We have handled in Ontario Tanlac since December, 1915, while our total purchases have amounted to 12 cars within the past two years."

The Owl Drug Company of San Francisco, the largest retail druggists on the Pacific Coast, state that they have sold more than 100,000 bottles of Tanlac, which surpasses the remarkable record of the Jacobson Pharmacy Company of Atlanta, who have sold approximately 80,000 bottles at retail.

These enormous sales mean, but one thing, and that is—MERIT.

Tanlac is widely advertised. It is true, but such an unprecedented and rapidly growing demand could not be brought about by advertising alone. One who is sold in a neighborhood through advertisement, but ten more bottles are sold in that community after the first bottle is given.

People are always willing to talk about their ailments, but they are more than willing to tell others of the medicine that helps them.

Tanlac is composed of the most beneficial roots and herbs known to science. The formula complies with all national and state pure food and health laws of both the United States and Canada; and absolute merit and merit alone is responsible for its phenomenal and growing popularity.

Tanlac is sold in El Paso by Kelly & Pollard and by the leading druggists in practically every city, town and village in America.—Ad.

## SAYS JUSTICE OWES COUNTY

Auditor Files Statement on Alleged Indebtedness Of A. J. Hall.

A financial statement showing the amount which A. J. Hall, justice of the peace, is indebted to the county and to county officials, was filed with the county commissioners at their meeting Monday afternoon by Joe Escalada, county auditor, accompanying the statement was a copy of a letter written to Hall by Escalada, in which he made formal demand for a settlement. The commissioners declined to receive and file the statement and to call it to the attention of the district attorney.

The statement alleges Hall is indebted as follows: For the period ending May 25, 1919—Due from November quarter, \$68.77; balance due to May 21, 1919, \$1.00; balance due to November quarter, \$125.40; balance due sheriff, \$115. The total indebtedness is given as \$315.17, as shown by the financial report which is a result of the recent auditing of the books of Hall's court. The commissioners did not comment upon the report, further than to adopt the formal motion for its acceptance.

**Sheriff's Allowance Increased.**  
Sheriff Seth Oremort appeared before the commissioners' court and explained to the members that he would be unable to continue the office with the same service and the same number of deputies he now has, and still remain within his budget. He requested that the commissioners grant him an extra salary allowance, in order that he might retain the present force of seven deputies. The commissioners voted that \$70 shall be allowed for the extra salaries of the deputies.

The commissioners discussed at some length the matter of fuel for the coming year and following a discussion of the merits of coal and oil as fuels, it was decided that county house engineer Snyder should be instructed to prepare an estimate of the cost of installing oil burners in the heating plants of the buildings, with statistics showing the relative fuel value and cost of oil and coal and the certainty of obtaining a plentiful supply of oil.

**Oil Plan Favored.**  
The commissioners estimated that the cost of changing the present system from a coal burning to an oil burning plant would be small and would be more than covered in the saving which would be made by burning oil. The extra labor saved and the disposal of ashes also were discussed and led the commissioners to a favorable expression regarding the oil burners.

The commissioners met at 10 o'clock Tuesday morning as a board of appeals to handle increase complaints growing out of the recent sessions of the board of tax equalization. Chas. have been mailed to all persons whose taxes were increased and those, if they desire to make complaint, are expected to attend one of the sessions of the board of appeals. The board of appeals will adjourn next Monday evening.

**THE COURTS.**

**STW COURT OF CIVIL APPEALS.**  
J. R. Harper, E. F. Higgins and A. M. Walcott, justices.

Motions for rehearing overruled. Sweetwater Ice & Cold Storage Co. vs. Continental State Bank of Sweetwater, from Nolan; C. C. Joe vs. Continental Oil & Cold Storage Co., et al., from Taylor; J. W. Meadows vs. R. H. Sherrill, et al., from Haskell.
